Luna is a portable inflatable structure that is ideal for use as a bar, serving area or reception for any event. This non-permanent, easy-to-install unit can instantly create a stylish chill out zone or retail space. Just a little larger than your household microwave and weighing under 23kgs, it's easily transported and stored. Available in Brilliant White.

Please note this information is given as guidance only. For specific details on structure and accessory positions please refer to technical drawings or build manual where applicable.
